## **SERVING CONCEPT**

Fast & efficient serving

## Serving Concept - Protects the flavour of your coffee

Expecting lots of guests today? Regardless of how many are coming, everyone should get a fresh, good-tasting cup of coffee, and service should be fast. Coffee breaks should be pleasurable – not a long wait in a queue. With the help of Serving Concept, all your coffee wishes can come true.

### Double Tower

Brewing with Tower is twice as fast, as it takes place on both sides simultaneously. An easy-to-use brewer that makes 10 litres of coffee in about 7 minutes, with the option of full or half brewing. An alarm signalling that brewing is finished, tea water dispensing and two 5-litre serving stations with tap, sight glass and integrated handle.

### Single Tower

A quick, easy-to-use brewer with the options of full and half brewing. A full brew, i.e. 5 litres, takes about 7 minutes. Tea water dispensing and alarms to signal when brewing is finished come standard. The brewing takes place directly into a 5-litre serving station with tap, sight glass and integrated handle.

*Always ready  
to serve*

## Mega Gold M/A

An effective brewer with manual or automatic water refill. Its capacity is approx. 17 cups in 7 minutes, and brewing takes place directly in a practical 2.4 litre serving station. The brewers with automatic water refill have a digital display and an alarm that signals when brewing is finished. The brewing amount can be adjusted between 4 and 17 cups.

## Grinder Original

An elegant and silent grinder for grinding coffee beans directly into the filter holder or measuring cup. A clear display shows the number of cups to be ground. You can even select the coarseness. Fits all our Original and Serving Concept coffee brewers, as well as most 1.8 litre brewers on the market. The bean canister can hold about 2.5 kg of beans.
